

Carbon Balance Sheet

Our complete Scope 1, 2 and 3 Carbon Dioxide Equivalent footprint is summarised here. All units are gross tCO2e unless stated otherwise.

For Scopes 1 and 2, we have maintained carbon neutral status this year as a result of switching to renewable energy and purchasing verified carbon offsets.

Scope 3 is most of our gross emissions, with Purchased Goods & Services, and Use of Sold Products being the two largest categories as these are associated with our hardware products. This year we have calculated all our product emissions with lifecycle assessments.

Our emissions in FY23, when comparing the same calculation methodology with FY22, show a moderate reduction. As more changes are made in mass production, combined with the latest data on electricity grids, we will begin to see reductions over time.

Our CO2e Footprint in Perspective

Using an estimate of 0.5kg of carbon per square metre of forest in the US, we can estimate that our emissions are equivalent to a forest approximately 230km2 in size. Approximately the size of Osaka, Japan.

Note: the following categories do not apply to the Focusrite Group:

- 08: Upstream leased assets
- 13: Downstream leased assets
- 14: Franchises
- 15: Investments

Blue values indicate a recalculated value using FY23 methodology.
